China's Tariff Exclusion Process Explained

Report Categories:

Trade Policy Monitoring

Report Highlights:

On May 13, 2019, China's State Council Customs Tariff Commission (SCCTC) announced that China will administer an exclusion process for additional Chinese tariffs imposed on specific products imported from the United States. Both enterprises and industry associations that import, produce, or use relevant products are eligible to apply through the new process for tariff exclusions. Official guidance encourages industry associations to represent their members and to apply for exclusions on their behalf. Applicants seeking tariff exclusion must submit documentation and commercial data describing how additional ad valorem tariffs on Chinese imports of U.S. agricultural goods (1) face challenges seeking alternative sources of goods; (2) cause serious economic damage to the applicant; and (3) cause major negative structural impacts on the relevant industries or lead to serious social consequences. China's Ministry of Finance (MOF) will accept exclusion applications for the published list of products (Attachment 2) from June 3, 2019, through July 5, 2019. Unofficial translations of the MOF's instructions for enterprises and industry associations seeking to apply for tariff exclusions are included in this report.

General Information:

China's Ministry of Finance has published a procedure for requesting tariff exclusion and a first list of applicable products. This report contains a general description of the process, eligible products, and unofficial translations of relevant documents. NOTE: While MOF's announcements and lists cover a very broad scope of U.S. products, this report is limited to only agriculture and related products. For a complete list of products covered, refer to the MOF, Trade Policy Research Center's website (<https://gszx.mof.gov.cn>).

While the MOF is managing the online platform, the SCCTC will oversee the decision-making process.

Eligible Applicants

Both enterprises and industry associations that import, produce, or use the listed products are eligible to apply. Official guidance encourages industry associations to represent their members and to apply for exclusions on their behalf.

Where to Apply

Enterprises and industry associations within mainland China may register, upload, and file application through MOF's Tariff Policy Research Center's website (<https://gszx.mof.gov.cn>).

Scope of Eligibility

The published list of products eligible for tariff exclusion includes 527 product lines of U.S. agriculture and related products from China's National Harmonized Schedule (HS). See Attachment 2. This list of products is associated with MOF's June 16, 2018 announcement in response to the U.S. Section 301 Investigation. See [GAIN report CH18034](#).

Note: Attachment 2 only covers agriculture and related products. For the complete published list, please see the MOF, Tariff Policy Research Center's website (<https://gszx.mof.gov.cn>).

Timing

MOF will accept applications for the published list of products (Attachment 2) from June 3, 2019, through July 5, 2019. MOF will publish an additional list of products eligible for tariff exclusion at a later date. The application window for this additional list is expected to be from September 2, 2019, through October 18, 2019.

Applicant Information

Enterprise applicants must submit copies of their official business license, their Uniform Social Credit Code, and an active Chinese mobile number, among other personally identifiable information.

Industry associations applying on behalf of certain member enterprises must submit the above

mentioned information for each such enterprise as well as the association itself, including a legal entity registration certificate.

Note: If an industry association has already compiled and submitted information from certain member enterprises, such enterprises may not resubmit application individually.

Product Data for the Application

Applicants must submit the following information in the online application.

A. Basic Product Information

- (1) Identifiable products that applied for exclusion
- (2) Tariff code – as defined by the HS 8-digit or 10-digit code, or product description.
- (3) Use of the products

B. Detailed Import Data for each HS Code for each product from the United States and from third countries for the last three years (2017 to 2019), as well as the Customs declaration forms for the top five largest imports for those years.

C. Impact of the tariffs on Enterprises

D. Factors of Consideration for Exclusion of Products

- (1) Substitutability of the products applying for exclusion
- (2) Rationale for application for exclusion based on facts and data.
- (3) Competitive influence on the overall industry

Note: To apply for products under multiple tariff codes, [applicants must] fill out and submit a form for each tariff code product.

Preliminary Application Review and Submission Process

A preliminary review of the application will be made. Once submitted, MOF has indicated a completeness determination will be made within 5 days. If not complete, applicants will receive feedback about the rejections and they can revise or resubmit the application. If the application is determined to be complete, the application will proceed to the expert panel for review.

Expert Review Panel

An expert review panel, appointed by the SCCTC, will consider the merits of each application. The committee will be composed of industry and technical experts and government officials. The panel will seek to identify the specific harm that the tariffs have on the overall economic structure or societal context of the Chinese industry, agricultural producers, or consumers. After the expert panel review is complete, eligible products for exclusion will be published on the MOF website.

Legal Statements

Applicants are accountable for the accuracy of the information submitted. Information that is false will

disqualify applicants from consideration. Information gathered as part of the exclusionary process is intended only to administer this process.

While MOF states that this information will not be shared with third parties without consent of the applicant, it can be used for other reasons for reasons such as complying with other government requirements, legal or policy needs.

Note: Currently, there are no any additional procedures for the submission of business confidential information.

Counseling Phone Hotline

MOF has announced a dedicated hotline for the exclusion process. Beginning on June 3, 2019, applicants can call if they encounter problems in filing and uploading the application information. The line is open Monday through Friday, 9:00 to 11:30 am China Standard Time and 2:00 to 5:00 pm China Standard Time. The hotline will likely on be operated by Mandarin speakers.

MINISTRY OF FINANCE ANNOUNCEMENT

State Council Customs Tariff Commission Notice on the
Trial Implementation of the Exclusion Process for Eligible U.S. Products Subject to Ad Valorem Tariffs
(Tariff Commission Notice [2019] No. 2)

According to the stipulations of the Customs Law, Foreign Trade Law, Import-Export Tariff Regulations, and other relevant laws and regulations, the State Council Customs Tariff Commission has decided to launch exclusion work for U.S. products subject to ad valorem tariffs on a trial basis. According to the applications of Chinese stakeholders, we will exclude some of the products that meet requirements from the scope of ad valorem tariffs on U.S. products. We will take exclusion measures such as temporarily not imposing ad valorem tariffs and refunding ad valorem tariffs collected on products that have the conditions necessary for refunding tariffs. See the attachment for Trial Measures on the Exclusion Work for U.S. Products Subject to Ad Valorem Tariffs.

1) Applicants

Applicants should be stakeholders applying for product exclusion, including enterprises in China or their industry or business associations that import, produce, or use relevant products. We encourage industry and business associations to represent their members in making applications.

2) Scope of Eligibility for Exclusion Applications

The scope of eligibility for exclusion applications is products for which we have already announced implementation of ad valorem tariffs which have not been canceled or temporarily suspended.

The first batch includes the products in the attachment List 1 of U.S. Products Subject to Ad Valorem Tariffs of the State Council Customs Tariff Commission Notice on Ad Valorem Tariffs on \$50 Billion of Imported Products Originating in the United States ([Tariff Commission Notice \[2018\] No. 5](#)), and List 2 of U.S. Products Subject to Ad Valorem Tariffs of the State Council Customs Tariff Commission Notice on Ad Valorem Tariffs on About \$16 Billion of Imported Products Originating in the United States ([Tariff Commission Notice \[2018\] No. 7](#)).

The second batch includes the products in attachments 1-4 of the State Council Customs Tariff Commission Notice on Ad Valorem Tariffs on Certain Imported Products Originating in the United States (Batch 2) ([Tariff Commission Notice \[2018\] No. 6](#)). The above two batches of products do not include automobiles and auto part products for which ad valorem tariffs have already been canceled or temporarily suspended.

3) Application Method and Timeframe

Applicants should fill out and submit their exclusion applications according to requirements via the Ministry of Finance, Tariff Policy Research Center web address: <http://gszx.mof.gov.cn>.

We will begin accepting applications for the first batch of products eligible for exclusion applications starting June 3, 2019 and lasting through July 5, 2019. We will begin accepting applications for the second batch of products eligible for exclusion applications starting September 2, 2019 and lasting through October 18, 2019.

4) Requirements for Filling Out and Submitting Applications

To apply to exclude a tariff code (eight digits, same for the below references) product, [applicants must] fill out and submit a form. To apply to exclude products under multiple tariff codes, [applicants must] fill out and submit a form for each tariff code product. For the same tariff code product, if an enterprise has already submitted information to an industry or business association and the industry or business association has already compiled and submitted it, the enterprise may not fill out and submit it again.

The applicant should completely fill out and submit exclusion application information according to the specific instructions and requirements for exclusion applications in the above web address. They should use facts and data to explain the following three aspects of their reason for application: difficulties faced in seeking alternative sources of goods; how ad valorem tariffs cause serious economic damage to the applicant; how ad valorem tariffs will have a major negative structural impact on the relevant industries (including impact on industry development, technological advances, employment, environmental protection, etc.) or lead to serious social consequences. Applications that do not fulfill these requirements will not be accepted.

Applicants should be responsible for the truthfulness of the information they fill in and submit. If we discover false information during examination, we will not consider the exclusion application submitted by the relevant applicant. Information filled out and submitted by the applicant will only be used for the exclusion work of ad valorem tariffs on U.S. products. We will not release it to third parties without the agreement of the applicant, except for reasons such as complying with government requirements, legal or policy needs, etc.

5) Issuance of Exclusion Lists

The State Council Customs Tariff Commission will organize a review of valid applications one by one. We will launch investigations and research; listen to the opinions of relevant experts, associations, and departments; and draft and issue exclusion lists according to procedure. [Note: Due to characteristics of the Chinese language, it is unclear whether there will be a single exclusion list or multiple exclusion lists. For the purposes of this translation, we are working on the assumption that there will be multiple lists released over an undefined period of time.]

For products on an exclusion list, we will not collect any more ad valorem tariffs in retaliation for U.S. Section 301 measures within one year of the implementation date of the exclusion list. We will refund

ad valorem tariffs already collected on products that have the conditions necessary for refunding tariffs. The relevant importing enterprises should apply to Customs according to regulations within six months of the release of an exclusion list. Ad valorem tariffs already collected on products whose ad valorem tariffs are canceled or suspended before an exclusion list is issued will not be refunded.

There are two main situations under which [products] possess the conditions for a tariff refund. One is where an exclusion list conducts exclusion based on a tariff code, and the second is where a product on an exclusion list is part of a tariff code and customs has the conditions to refund tariffs, for example, where customs has an additional code on top of the base tariff code.

(1) Product Information

A product with 8-digit tariff code (here after referred to as tariff code) can only apply for once.

- 1) **Product for Exclusion:** Please describe the product for exclusion. For example: A safe with finger print function. Different enterprises have different descriptions for the same tariff code, industry association should compile and summarize then submit.
- 2) **Tariff Code:** Search based on product name and tariff code. There are options to include all commodities under that same tariff code, or selective commodities under the same tariff code. If the applicant only wants to exclude selective commodities under a tariff code, there are two options: one is to choose one or multiple commodities based on 10-digit codes code to pick one or multiple choices; the other is to clearly describe the shape or characteristics of a product that Customs can visually distinguish.
- 3) **Intended Product Applications.** This refers to the applications of an imported product. An industry association can select multiple choices after compiling all the applications of a product from all enterprises: foreign trade domestic sales, special zone domestic sales, other domestic sales, enterprises own use, processed then resell, borrow, deposit, provided for free, provided for a price etc.
