

Nicotine Dependence Treatment Strategies for Oral Health Professionals

Please note this is a two-part course:

1. *Every Smoker, Every Time* (ESET) Training Module
2. *Integrating Nicotine Dependence Treatment with Oral Health: For Dental Professionals Webinar*

Every Smoker, Every Time (ESET)

ESET training provides entry-level tobacco use related education for health care professionals. It includes information on effective brief intervention, nicotine replacement therapy, and referral options. The training takes approximately 45 minutes. Participants receive a completion email after passing a post-test with a score of at least 80%.

This training should be completed via self-study prior to moving on to the second part.

Integrating Nicotine Dependence Treatment with Oral Health: For Dental Professionals

The Northwest Pennsylvania Tobacco Control Program (NWPATCP) has partnered with the Pennsylvania Coalition for Oral Health (PCOH) to develop *Integrating Nicotine Dependence Treatment with Oral Health: For Dental Professionals*; a 1.25 hour tobacco and nicotine education training. The training translates information presented in ESET into the oral health setting with focus on providing support and additional training in referring dental patients to cessation treatment programming, offering tools to empower oral health professionals to conduct effective cessation counseling, and informing dental clinicians how to bill for these services. Attendees will be presented data supporting the logic behind offering cessation services as a natural extension of oral and overall health for patients who use tobacco and nicotine products, as well as encouragement to consider systems change towards that end.

Dental licensees who complete both trainings can earn 2.0 CEUs.

[Click here to register for the live webinar on 6/2 @ 12:30 p.m.](#)

Accreditation & Tobacco Cessation Registry Sequence

1. Take Every Smoker, Every Time, (ESET) at the Live Healthy PA website
accessed at: <https://www.livehealthypa.com/data-resources/data/tobacco/every-smoker-every-time> prior to participating in live Integrating Nicotine Dependence with Oral Health (INDTOH) training webinar (best accessed through desktop)
2. Complete ESET post-test with passing score of at least 80% to receive completion email/certification
3. Forward certificate of completion of ESET to info@paoralhealth.org
4. Complete INDTOH Webinar (live on June 2nd @ 12:30 p.m. - register above).
5. For CEUs complete INDTOH post-test with at least 80% proficiency
6. PCOH will automatically email CEU certificates to those who have completed both ESET and INDTOH.
7. (If a Medicaid Provider): Complete Tobacco Cessation Registry application and submit to DHS website to be authorized to bill for tobacco counseling
8. Go forth and counsel!
